

VERMONT MONEY FOR VERMONT

Hyde Park Savings Bank Policy Approved
From the Waterbury Record.

It has always been our consistent and constantly reiterated opinion that the best place in the world for Vermont investors to place their surplus cash is in the good old State of Vermont. We also hold in connection with the above opinion, that it is the duty of every Vermont citizen who has an investment proposition, safe, sane and following the principle of "Vermonters for Vermont," to exert every endeavor by every legitimate means within his reach to place his proposition before the citizens of Vermont.

We all, with no exceptions, like to have our expressed opinions vindicated, and it is with pleasure that we call attention to the record of the Hyde Park Savings Bank.

This is distinctly a Vermont institution, for it is their well known and commendable policy to keep Vermont money in Vermont, and they have been eminently successful. They have believed, as emphatically as we, that it was their duty to let Vermonters know of their policy, and it must be a great source of gratification to them, that Vermonters have responded to so large an extent.

We heartily congratulate this bank and its President, Ex-Gov. Carroll S. Page, upon their success, and we also take pride in the demonstrated fact, that if one wishes to reach the people of Vermont, the way to do it is through the Vermont Press.

OPERA HOUSE NOTES.

"A Royal Slave" which comes to the opera house next Monday, is to be one of the real events of the theatrical season in this city. Of all the romantic dramas seen last season, few were as well received as Clarence Bennett's beautiful production of the Southland. It is not only unusual in dramatic construction, but is magnificent in its scenic investment, every piece of scenery used in the production being carried by the company.

Easter Excursion to New York.

Lines on Today.

I sing a merry melody
To my unbroken natal day—
If I were wise as well as gay,
I would not dare!

I'd feel within a thrill of shame
If others did not breathe its name.
I ask my friends to drink with me
Toasts to its popularity.

But they all turn away from me
As coldly stare;
Do they, then, marvel at my zest,
Or see no insult in my jest?

Needs must I drink my toast alone
Each has a good drink of his own,
Or see an insult in my jest?
moan

With doleful prayer—
Am I the only wight on earth
Who dares claim Fools' Day for
his birth?

So here alone I fill my cup,
And as I lift the beaker up
In all the follies that I sup
I bid you share!

Dame nature has small use for rules
All fools were born on "All Fools!"

Death Was On His Heels.

Jesse P. Morris of Skippers, Va., had a close call in the spring of 1903. He says: "An attack of pneumonia left me so weak and with such a fearful cough that my friends declared consumption had me, and death was on my heels. Then I was persuaded to try Dr. King's New Discovery. It helped me immediately, and after taking two and a half bottles I was a well man again. I found out that New Discovery is the best remedy for coughs and lung disease of all the world." Sold under guarantee at Red Cross Pharmacy, 50c and \$1.00. (This bottle free.)

FAIR EXCHANGE.

A New Back For an Old One—How It Is Done In Barre.

The back aches at times with a dull, indescribable feeling, making you weary and restless; piercing pains shoot across the region of the kidneys, and again the joints are so lame to stoop is agony. No use to rub or apply a plaster to the back in this condition. You cannot reach the cause. Exchange the bad back for a new and stronger one. Follow the example of this Barre citizen.

M. L. Spaulding, painter, living on Branch street, Barre, Vt., says: "I had more or less kidney trouble for five years, and think it was brought on by conditions which any man working at my trade is subject to. After a hard day's work there would be such an aching in my back that I could hardly sleep at all. Dark spots floated before my eyes at times, and the action of the kidneys was plainly showed that my kidneys were disordered. The use of two boxes of Doan's Kidney Pills, procured at E. A. Down's drug store, stopped the backache and corrected the kidney weakness so that the secretions were regulated and became natural in color."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States. Remember the name—Doan's—and take no other.

FIERCE CANINES.

The Wolfish Dogs of Newfoundland and Labrador.

On the extreme northern coast of Newfoundland, as well as on Labrador, the fishing villages and settlements are all situated in the harbors and creeks along the seashore. In the summer all intercommunication with the various villages is by water, so that the roads are very primitive. In winter, when the ground is covered with snow and the marshes and lakes are frozen, the people utilize dogs and "comaticas" to travel to and fro, and also for hauling firewood, building material, etc. These dogs are savage mongrels, closely allied to their progenitor, the wolf; in fact, they are half wolf.

The residents do not trouble much about these mongrels in the summer, and they are generally kept in a state of semistarvation. They feed on fish offal during the fishing season, and occasionally band together and go a-hunting on their own account. On these occasions they will attack anything they come across, man or beast, and so fierce are their depredations that caribou, which are plentiful in Labrador, can only on rare occasions be found within twenty-five miles of the seacoast, as these mongrels have destroyed or driven them all inland.

Last winter it was reported that a team of dogs turned on the driver and devoured him and his wife and child, who were accompanying him to a distant settlement. It has been long recognized that these packs of savage dogs were great obstacles in the way of the progress of the people in these parts. It was impossible for them to keep cows, sheep, goats or even poultry—Forest and Stream.

EARTHWORMS.

They Can Move About Only When the Ground Is Damp.

Ever since Darwin wrote his remarkable book on earthworms the general public has taken an interest in these lowly creatures. Everybody has observed thousands of them on the cement walks during and after a rain, but the true cause of these remarkable wanderings is not often written about. The fact is that earthworms can move about only when the ground and the grass are wet. The truth of this is easily shown by placing an earthworm on some dry sand, when the dry grains will stick to its slimy skin and make it helpless.

All living creatures are endowed with the instinct to move and spread over the earth. Human beings, higher animals and birds prefer to move about in fair weather. To the earthworm and other lowly creatures, like frogs, salamanders, slugs and land snails, rainy days are the only days for traveling. When the sun comes out and dries the roads and the meadows, they withdraw into their hiding places. As earthworms cannot see clearly, they crawl about in an aimless sort of way. If they happen to get on a board or cement walk, when the sky clears they soon die and shrivel up.

When a dry season or winter approaches, the earthworms burrow deeper into the ground. At a depth varying from six inches to two feet each worm coils up into a little ball. By aid of secreted slime it makes a case of dirt round itself, and in this state it remains dormant until abundant rains or the spring thaws call it back to a more active life.—St. Louis Republic.

The Reptile.
Schoolmaster—So, then, the reptile is a creature which does not stand on feet and moves along by crawling on the ground. Can any one of you boys name me such a creature? Johnny—Please, sir, my baby brother.—London "Tit-Bits."

An Untold Tale.

Well Known Signal.

The trainman who when sober was so competent that the officials had winked at his occasional bibulous lapses was at last called up on the carpet.

"What does this mean?" asked the trainmaster sternly. "A month ago you went on a prolonged bad when we were short handed—stayed drunk a month. Then recently you were away on two different occasions for a half week each time. What does it mean?" "Why," said the trainman, "I am surprised that you should ask me what it means. I had understood that you came up from the ranks yourself, and yet you ask me the meaning of one long foot and two short ones. I thought everybody knew that was the signal to stop."—Chicago News.

When Children Smoked.

Every one has read that Hawkins introduced tobacco into England and that King James inveighed against it. Elizabeth liked to sit on a low stool and watch Sir Walter Raleigh puffing away. In Anne's reign almost every one smoked. In Charles II's reign "children were sent to school with their pipes in their satchels, and the schoolmaster called a halt in their studies while they smoked."

In 1702 Jorevian spent an evening with his brother at Garraway's coffee house, Leeds, and writes: "I was surprised to see his sickly child of three years old fill its pipe of tobacco and smoke it as audaciously as a man of threescore. After that a second and third pipe without the least concern, as it is said to have done above a year ago."

The Dark and Bloody Ground.
Before the white man began to explore Kentucky, about the middle of the eighteenth century, the region was a vast hunting ground for many large tribes of the south, north and east, and between these tribes there was continuous conflict for the possession of the rich game privileges. Later on, when the white people settled in the territory, their struggle with the red men was more bitter and persistent than in almost any other section of the continent; hence the sanguinary name that was given to the territory, "The Dark and Bloody Ground."—New York American.

Never Tested.
"You have a great many friends."
"I don't know whether I have any friends at all or not."
"You don't?"
"Nope. I was born rich and have never been broke."—Houston Post.

You Will Need an Oil Stove

When warm days and the kitchen fire make cooking a burden—then is the time to try a New Perfection Wick Blue Flame Oil Cook-Stove.

Marvelous how this stove does away with kitchen discomforts—how cool it keeps the room in comparison with conditions when the coal

fire was burning. The quick concentrated heat of the

NEW PERFECTION Wick Blue Flame Oil Cook-Stove

goes directly to boil the kettle or bake the bread, and none is diffused about the room to overheat it. Thus using the "New Perfection" is real kitchen comfort. Made in three sizes and fully warranted. If not with your dealer, write our nearest agency.

ECCENTRIC HOGARTH.

Incidents in the Life of the Vain and Able Artist.

Hogarth, one of the ablest and certainly one of the vainest artists that England has produced, was as a painter hardly recognized in his lifetime, to his bitter grief and disappointment. He made money out of his prints, but could only sell his pictures with difficulty and at low prices.

Yet Whistler once declared that Hogarth was our greatest painter. He painted some admirable portraits, but his manner was too independent and his tongue too sharp for success in a profession that requires a certain amount of diplomacy and much patience.

He resented any criticism of his work, and there is a story of a very ugly peer whom he painted that illustrates this. The portrait was returned to the artist. It was, in fact, too good a likeness.

But Hogarth declined to alter it. In the least and told his sitters that unless the portrait was paid for in three days he would add a tail to the figure and sell it to a wild beast showman to hang outside one of his caravans. The peer paid the money and instantly destroyed the picture.

More curious still is a story of Hogarth's absence of
